PROJECTS

- Projects using HTML, CSS, JavaScript :-
 - 1) **Calculator** : A calculator project using html, css and javascript.
Link : <https://saurabhhattji.github.io/NewCalculator/>
 - 2) **Notes App** : Making a notes app using Html Css and Javascript. In this notes app there is a **saving** and **deletion** feature for every **Note** is available. The **Local storage** property of javascript is used to save the notes.
Link: <https://saurabhhattji.github.io/NewNotesApp/>
- Projects using React.Js :-
 - 1) **E-commerce**: An E-commerce app. This website is a **Responsive** website using styled component. **React-router V6** is used to make this application is a single page application. A product API is fetched using **AXIOS** method and Context API is used in this website to get the data from the sever. **React hooks** are used to build this website. It has functionality of **Add to Cart**, **Remove from Cart**, Filters like **price low to high**, **high to low**, **ascending** order, **descending** order, **category**, **company**, **priced & color** wised. Contact page is created with functionality of **google map** and **formspree** which contain the functionality of send the message to the respected email.
Link: <https://gentle-unicorn-a0a990.netlify.app/>
 - 2) **YouTube-Clone**: A fully functional youtube clone app using Rapid API & tailwind css. This website is a **Responsive** website using styled component. **React-router V6** is used to make this application is a single page application. A product API is fetched using **AXIOS** method and Context API is used in this website to get the data from rapid api.
In this app categories like **trending**, **gaming**, **music**, **films**, **news**, **learning** and other section like YouTube. After clicking on that category, the page is redirect to the particular section without re-render just like YouTube or after clicking on a particular video the video play just like YouTube & suggested video added next to the video.
Link: <https://bucolic-bunny-563081.netlify.app/>
 - 3) **TextUtils** : A textutils app for converting the text into **Uppercase**, **Lowercase**, **Copy** the whole text to clipboard, **Clear** all the text and **Remove** the extra spaces from the text. It has functionality of **Preview** the text, **Dark mode**, **Word counter** and **Character counter**.
Link: https://saurabhhattji.github.io/Text_utils/
 - 4) **News App** : Updated news with feature as different **Categories** to select a particular type of news. News **API** is used to fetch news with **useEffect** hook. In this news app **React-router V6** is used to make this application is a single page application and use **Infinite** scroll functionality. This website is a **Responsive** website using **Bootstrap** framework.
